THE INJURY-PROOF WARM-UP

A 10-minute warm-up for young athletes

01 —— START HERE

THE INJURY-PROOF WARM-UP

Programs that teach young athletes to land, cut, and build strength reduce knee injuries. This warm-up takes 10 minutes before practice. Parents: watch the first few sessions and check the landings.

WHY THIS WORKS

- Soft, quiet landings with knees over toes protect the ACL.
- Strong hamstrings and groin muscles are the most common injury gaps.
- Teens who sleep less than 8 hours get hurt more.

GREEN · KEEP GOING

0–3 / 10

Normal and safe. Settles within 24 hours.

AMBER · ADJUST

4–5 / 10

Fewer reps, less range, or lighter load. Keep moving.

RED · FLARE-UP PLAN

6+ / 10

Or pain that's worse the next morning. Switch to the 3-day plan.

EXERCISE PAIN VS. PAIN PAIN

Exercise pain is the muscle working: burning, fatigue, effort. That's fine. **Pain pain** is sharp, pinching, or your old pain getting worse. If it's pain pain, stop, make a note, and do less range or a gentler version.

02 —— THE ROUTINE

DO THIS ONCE OR TWICE A DAY

Slow and controlled. Breathe the whole time. Effort 5–6 out of 10. Every exercise has a video in the RESET library.

1 THE ROUTINE *about 10 minutes*

VIDEO	EXERCISE	DOSE	GYM OPTION	COACHING CUE
X143	A-Skip	2 × 15 yd	Same	Knee up, toe up, strike down under the hip.
X059	Lateral Lunge	6 / side	Goblet lateral lunge	Sit into one hip, other leg straight.
X112	Drop Landing	5 reps, stick each	Same	Step off a low box, land quiet, knees over toes.
X082	Assisted Nordic Curl	2 × 3	Band-assisted Nordic	Lower as slowly as you can.
X092	Copenhagen Side Plank	15 sec / side	Same	Knee on a bench, lift the hips.
X111	Single-Leg Hop and Stick	3 / side, stick it	Same	Hop forward, land soft, hold 3 sec.

HOW TO KNOW IT'S WORKING

After a week, you should move a little easier and the bad moments should be less intense or shorter. That's the alarm turning down. Keep going, then start building real strength. That's what Block 01 is for.

03 —— SAFETY FIRST

WHEN TO SEE A PROVIDER FIRST

This guide is for ordinary aches and stiffness. Stop and get evaluated if any of these apply.

WARNING SIGN	WHY
Pain that changes how you move or play	That's an injury, not soreness. Get it evaluated first.
A recent injury or surgery you haven't been cleared from	Get clearance, then start here.
Chest pain, fainting, or unusual shortness of breath with exercise	Stop and get seen before training.
Bone pain that worsens with every session and hurts at rest	Rule out a stress fracture.
Headache, dizziness, or fogginess after a hit to the head	Possible concussion. No training until cleared.
Numbness, tingling, or weakness in an arm or leg	Needs a nerve evaluation before loading.

This guide is education, not medical care. It doesn't diagnose or treat any condition or replace an evaluation by your own provider. In an emergency, call 911. Results vary.

04 —— WHAT'S NEXT

RELIEF IS STEP ONE

Feeling better comes first. Strength is what keeps it from coming back. The 12-week program takes you from relief to real strength in four phases.

PLAN	WHAT YOU GET	PRICE
SELF-GUIDED	The full 12-week Block 01 guide, video library, and tracking tools	$197 one time
CUSTOM	Programming tailored to you, weekly guidance and adjustments	$133 / month
DOCTOR-LED	Weekly meeting with Dr. Urrutia, personalized progressions	$333 / month

START THE PROGRAM
