THE KNEE RELIEF KIT

Isometrics and moves that ease knee pain

FREE

01 —— START HERE

THE KNEE RELIEF KIT

Knee pain usually means the knee's workload got ahead of its strength. Isometric holds often ease pain within minutes, and the rest of this routine starts rebuilding the muscles that protect the joint.

WHY THIS WORKS

- Holding a muscle still under load can calm a painful knee or tendon.
- Weak hips let the knee drift inward. Hip work is knee work.
- Avoiding stairs and squats weakens the quads that protect your knee.

GREEN · KEEP GOING

0–3 / 10

Normal and safe. Settles within 24 hours.

AMBER · ADJUST

4–5 / 10

Fewer reps, less range, or lighter load. Keep moving.

RED · FLARE-UP PLAN

6+ / 10

Or pain that's worse the next morning. Switch to the 3-day plan.

EXERCISE PAIN VS. PAIN PAIN

Exercise pain is the muscle working: burning, fatigue, effort. That's fine. **Pain pain** is sharp, pinching, or your old pain getting worse. If it's pain pain, stop, make a note, and do less range or a gentler version.

02 —— THE ROUTINE

DO THIS ONCE OR TWICE A DAY

Slow and controlled. Breathe the whole time. Effort 5–6 out of 10. Every exercise has a video in the RESET library.

1 THE ROUTINE *about 10 minutes*

VIDEO	EXERCISE	DOSE	GYM OPTION	COACHING CUE
X063	Spanish Squat Hold	5 × 30 sec	Same	Band behind the knees, sit back, hold. Front-of-knee friendly.
X065	Terminal Knee Extension	2 × 15 / side	Cable TKE	Band behind the knee, straighten fully.
X066	Straight Leg Raise	2 × 10 / side	Same, ankle weight	Tighten the thigh first, lift to the other knee height.
X067	Heel Slides	10 / side	Same	Slide the heel toward you, then straighten.
X008	Knee-to-Wall Ankle Rocks	10 / side	Same	Heel stays down, knee tracks over the middle toes.
X070	Glute Bridge	2 × 10	Same	Squeeze glutes first, ribs down.

HOW TO KNOW IT'S WORKING

After a week, you should move a little easier and the bad moments should be less intense or shorter. That's the alarm turning down. Keep going, then start building real strength. That's what Block 01 is for.

03 —— SAFETY FIRST

WHEN TO SEE A PROVIDER FIRST

This guide is for ordinary aches and stiffness. Stop and get evaluated if any of these apply.

WARNING SIGN	WHY
Knee locks or gives way	Can mean a mechanical problem like a meniscus or ligament tear.
Hot, red, swollen knee, especially with fever	Rule out infection or gout. Get seen the same day.
Can't bear weight after a fall, twist, or blow	Rule out a fracture or ligament injury.
Large swelling within hours of an injury	Often bleeding in the joint. Needs evaluation.
Calf pain, swelling, and warmth	Rule out a blood clot, especially after surgery or travel.
Night pain no position eases, or unexplained weight loss	Not typical of mechanical knee pain.

This guide is education, not medical care. It doesn't diagnose or treat any condition or replace an evaluation by your own provider. In an emergency, call 911. Results vary.

04 —— WHAT'S NEXT

RELIEF IS STEP ONE

Feeling better comes first. Strength is what keeps it from coming back. The 12-week program takes you from relief to real strength in four phases.

PLAN	WHAT YOU GET	PRICE
SELF-GUIDED	The full 12-week Block 01 guide, video library, and tracking tools	$197 one time
CUSTOM	Programming tailored to you, weekly guidance and adjustments	$133 / month
DOCTOR-LED	Weekly meeting with Dr. Urrutia, personalized progressions	$333 / month

START THE PROGRAM
