THE 10-MINUTE BACK RESET

Most back pain isn't damage. It's a back that got stiff, weak, and sensitive while life piled on. These seven moves calm it down and get you moving again. Do them once or twice a day for a week.

WHY THIS WORKS

- It built up over time. One ordinary moment was just the straw that broke the camel's back.
- Rest makes it worse. Guarding stiffens the spine and weakens the muscles that protect it.
- Gentle, regular movement turns the pain alarm down faster than anything else you can do at home.

GREEN · KEEP GOING

0–3 / 10

Normal and safe. Settles within 24 hours.

AMBER · ADJUST

4–5 / 10

Fewer reps, less range, or lighter load. Keep moving.

RED · FLARE-UP PLAN

6+ / 10

Or pain that's worse the next morning. Switch to the 3-day plan.

EXERCISE PAIN VS. PAIN PAIN

Exercise pain is the muscle working: burning, fatigue, effort. That's fine. **Pain pain** is sharp, pinching, or your old pain getting worse. If it's pain pain, stop, make a note, and do less range or a gentler version.

02 —— THE ROUTINE

DO THIS ONCE OR TWICE A DAY

Slow and controlled. Breathe the whole time. Effort 5–6 out of 10. Every exercise has a video in the RESET library.

1 THE ROUTINE *about 10 minutes*

VIDEO	EXERCISE	DOSE	GYM OPTION	COACHING CUE
X001	90/90 Breathing	5 slow breaths	Same	Feet on the wall, exhale fully, let the low back soften.
X014	Supine Knee Rocks	10 each way	Same	Let the knees fall side to side.
X002	Cat-Camel	8 slow reps	Same	Slow, segment by segment.
X095	Bird Dog	6 / side	Same	Reach long, hips level.
X070	Glute Bridge	2 × 10	Same	Squeeze glutes first, ribs down.
X009	Half-Kneeling Psoas Stretch	30 sec / side	Same	Squeeze the back glute, tuck the tail.
X010	Hamstring Floss (lying)	10 / side	Same	Straighten and bend the knee smoothly.

HOW TO KNOW IT'S WORKING

After a week, you should move a little easier and the bad moments should be less intense or shorter. That's the alarm turning down. Keep going, then start building real strength. That's what Block 01 is for.

03 —— SAFETY FIRST

WHEN TO SEE A PROVIDER FIRST

This guide is for ordinary aches and stiffness. Stop and get evaluated if any of these apply.

WARNING SIGN	WHY
Loss of bladder or bowel control, or numbness in the groin	Call 911 or go to the ER.
Leg weakness that's getting worse	Needs evaluation before exercise.
Fever, unexplained weight loss, or history of cancer	Rule out something systemic.
Pain after a fall or crash	Rule out a fracture first.
Severe night pain no position eases	Not typical of mechanical back pain.

This guide is education, not medical care. It doesn't diagnose or treat any condition or replace an evaluation by your own provider. In an emergency, call 911. Results vary.
