THE PICKLEBALL WARM-UP

Eight minutes that prevent the most common tweaks

01 —— START HERE

THE PICKLEBALL WARM-UP

Pickleball is quick stops, short sprints, and reaches. A structured warm-up is one of the best-supported ways to prevent injuries in court and field sports. Do this before every session.

WHY THIS WORKS

- Quick stops load the calves and Achilles over and over.
- Side-to-side movement is the weak link for most players.
- Overheads and dinks stress a rotator cuff that rarely gets trained.

GREEN · KEEP GOING

0–3 / 10

Normal and safe. Settles within 24 hours.

AMBER · ADJUST

4–5 / 10

Fewer reps, less range, or lighter load. Keep moving.

RED · FLARE-UP PLAN

6+ / 10

Or pain that's worse the next morning. Switch to the 3-day plan.

EXERCISE PAIN VS. PAIN PAIN

Exercise pain is the muscle working: burning, fatigue, effort. That's fine. **Pain pain** is sharp, pinching, or your old pain getting worse. If it's pain pain, stop, make a note, and do less range or a gentler version.

02 —— THE ROUTINE

DO THIS ONCE OR TWICE A DAY

Slow and controlled. Breathe the whole time. Effort 5–6 out of 10. Every exercise has a video in the RESET library.

1 THE ROUTINE *about 10 minutes*

VIDEO	EXERCISE	DOSE	GYM OPTION	COACHING CUE
X118	Lateral Shuffle	2 × 10 yd each way	Same	Low hips, quick feet, don't cross.
X059	Lateral Lunge	6 / side	Goblet lateral lunge	Sit into one hip, other leg straight.
X085	Single-Leg Calf Raise	12 / side	Same, holding a DB	Slow lower, full range.
X026	Band External Rotation	12 / side	Cable external rotation	Towel under the arm, rotate out slowly.
X120	Split Step Reaction Drill	2 × 10 reps	Same	Small hop, land wide, react to a cue.
X012	90/90 Hip Switches	6 / side	Same	Rotate knees side to side, tall chest.

HOW TO KNOW IT'S WORKING

After a week, you should move a little easier and the bad moments should be less intense or shorter. That's the alarm turning down. Keep going, then start building real strength. That's what Block 01 is for.

03 —— SAFETY FIRST

WHEN TO SEE A PROVIDER FIRST

This guide is for ordinary aches and stiffness. Stop and get evaluated if any of these apply.

WARNING SIGN	WHY
Pain that changes how you move or play	That's an injury, not soreness. Get it evaluated first.
A recent injury or surgery you haven't been cleared from	Get clearance, then start here.
Chest pain, fainting, or unusual shortness of breath with exercise	Stop and get seen before training.
Bone pain that worsens with every session and hurts at rest	Rule out a stress fracture.
Headache, dizziness, or fogginess after a hit to the head	Possible concussion. No training until cleared.
Numbness, tingling, or weakness in an arm or leg	Needs a nerve evaluation before loading.

This guide is education, not medical care. It doesn't diagnose or treat any condition or replace an evaluation by your own provider. In an emergency, call 911. Results vary.

04 —— WHAT'S NEXT

RELIEF IS STEP ONE

Feeling better comes first. Strength is what keeps it from coming back. The 12-week program takes you from relief to real strength in four phases.

PLAN	WHAT YOU GET	PRICE
SELF-GUIDED	The full 12-week Block 01 guide, video library, and tracking tools	$197 one time
CUSTOM	Programming tailored to you, weekly guidance and adjustments	$133 / month
DOCTOR-LED	Weekly meeting with Dr. Urrutia, personalized progressions	$333 / month

START THE PROGRAM

Go to **resethybridrecovery.com/pickleball** to see the full 12-week plan and choose your level of support.

"Movement is medicine. We don't have weak bodies. We have weak systems."

Dr. Jonathan Urrutia, DC · Founder, RESET

RESET

REHAB • RECOVER • TRAIN

MOVEMENT IS MEDICINE.

Relief is step one. Strength keeps it gone.
